DETAILED ACTION

Election/Restrictions

Newly submitted claim 120 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: this is directed to the patentably distinct embodiment where an amorphous barium strontium titanate layer is formed on a silicon substrate and a monocrystalline compound semiconductor layer is formed on the barium strontium titanate layer.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 120 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Response to Arguments

As stated in the previous office action, the rejections under 35 USC 103 based on Guenzer, Kaushik, and JP (070 and double patenting rejections are maintained as set forth in the non-final Office Action dated 6/12/03 and are incorporated in their entirety into the present office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
